

IN THE SPECIFICATION:

Please replace paragraphs [0019] and [0024] with the following amended paragraphs:

[0019] Deformable material 102 extends outward from the steering control 105 over a predetermined section of the steering control which is shown in FIG. 1 to be an arc. Deformable second section 102 may extend outwardly from the steering control at or below the inside circumference of the control over the predetermined arc. This arc will typically include at least the ten 104 and two 106 o'clock positions, or may include the entire circumference. As shown in FIG. 1, the arc that covers the ten 104 and two 106 o'clock positions is disposed on the upper one-half ($\frac{1}{2}$) of steering control 105.

[0024] In FIG. 2, system 202 is at or near the ten o'clock position and system 203 is shown at or near the two o'clock position. As shown in FIG. 2, system 202 that is at or near the ten o'clock position and system 203 that is at or near the two o'clock position are disposed on the upper one-half ($\frac{1}{2}$) of steering control 211. Although, the two systems have been described as being positioned at the ten and two o'clock locations, it is understood that they may be placed at other locations around the rim and there may be more than two systems and still be within the scope of the present invention.
